Information Solution Manager (m/f/d)

YOUR ROLE

As an **Information Solution Manager**, you act as a trusted partner between business stakeholders, external IT providers, and regulatory requirements. You ensure the reliable operation of our IT landscape while driving the evaluation, implementation, and continuous improvement of innovative digital solutions in a highly regulated environment.

In your role within our IT team, you combine technical expertise, project leadership, and regulatory awareness to support business growth, operational excellence, and digital transformation across mainanalytics.

KEY RESPONSIBILITIES

- Own and continuously improve assigned IT systems throughout their lifecycle, ensuring availability, security, compliance, and business alignment
- Lead and support IT projects, including the evaluation, implementation, and optimization of digital solutions
- Act as the primary interface between internal stakeholders and external IT service providers
- Establish and maintain computerized system validation (CSV) processes and documentation in accordance with regulatory requirements
- Coordinate system deployments, upgrades, and changes through structured change management processes
- Provide technical support and guidance to employees while promoting efficient and secure use of IT systems
- Create and maintain IT, quality, and validation documentation, including SOPs and work instructions
- Monitor technology trends and identify opportunities to improve processes through modern, scalable, and future-ready solutions

QUALIFICATIONS

Required Qualifications

- Master's degree in Computer Science, Information Technology, a related field, or equivalent practical experience
 - At least 5 years of professional experience in an IT department or similar role ideally within a regulated environment (e.g. GxP)
- (see page 2)

ABOUT MAINANALYTICS

We are a well-known team of over 100 highly-motivated data managers, statistical programmers and biostatisticians with a wealth of experience.

Founded in July 2019 as an employee-owned CRO, we offer comprehensive expertise for the conduct, analysis and reporting of clinical studies – from preclinical to phase IV, and in various indications. We also support legacy data conversions, CDISC implementation, and submissions to global regulatory agencies.

Our professionals keep up-to-date on industry and regulatory standards as well as statistical methodology through continuous training. Several members of our team contribute their expertise in international, cross-organizational working groups and committees.

Teamwork, flexibility, timeliness, and accuracy are our strengths at mainanalytics.

We look forward to receiving your application. For any questions or to apply, please contact:
